

## The premier digital solution that measurably improves independence for students with autism and complex learning needs.

avail® utilizes evidence-based practices (EBP) to empower individuals with disabilities across all settings. With digital task analytic instruction and visual supports, individuals receive discrete prompting and feedback without intrusive one-on-one support. In a technology-driven world, use technology based on evidence to measurably improve learning and student independence.

### Digital Task Analytic Instruction

Task analytic instruction is an EBP for individuals with autism. Make task analytic instruction accessible in all environments, for all learners who need additional support.

### Reduce In-person Prompting

Digital supports and prompting reduce the need for intrusive, often stigmatizing in-person prompting. Give your students the discrete tool that is designed to meet their individual needs in all settings.

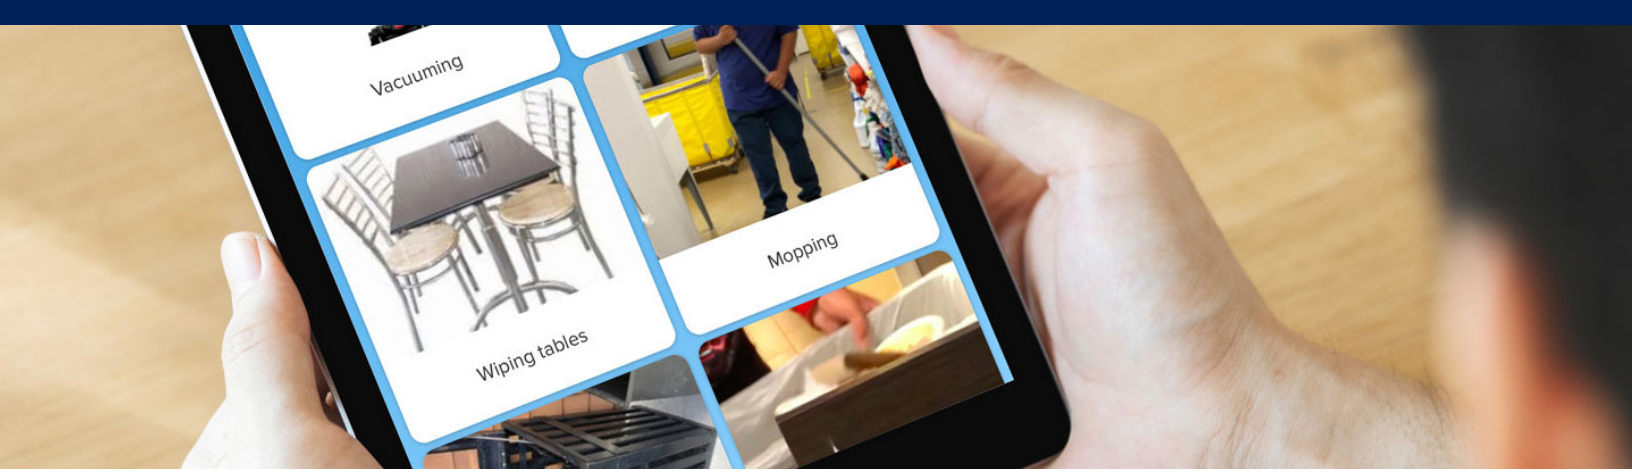

### Customize and Individualize Instruction

No two students are the same. Individualize instruction and support with easy to customize templates to meet the needs of all students.

### Powerful Data Analytics

Digital task analytic instruction provides educational teams with invaluable insight to student progress. Gain clear visibility to student progress with built-in assessments and data analytics.

avail® has been reported to reduce **the need for one-on-one assistance by 30%**, enhancing learning and independence in the classroom and beyond.

### What's Included? A one-year license includes

- Access to a comprehensive, individualized support tool for all students and team members
  - Intelligent data analytics and reporting, providing valuable insight to student progress
  - Equitable access for all students to a premier solution that utilizes evidence-based practices (EBP) to promote independence
